

## Checklist

First app start, notification permission pop-up:

| Test case                                      | Priority of testing | Result | Comment |
|------------------------------------------------|---------------------|--------|---------|
| Start app with allowed notification permission | High                | Passed |         |
| Start app with denied notification permission  | High                | Passed |         |

Language page:

| Test case                                      | Priority of testing | Result | Comment                                                                         |
|------------------------------------------------|---------------------|--------|---------------------------------------------------------------------------------|
| Restrict continuing without selecting language | Medium              | Passed |                                                                                 |
| Select romanian language, continue             | Medium              | Passed |                                                                                 |
| Select russian language, continue              | Medium              | 50/50  | Doesn't change language on "Language" page, but doesn't affects rest of the app |
| Select english language, continue              | Medium              | Passed |                                                                                 |

Login page:

| Test case                                     | Priority of testing | Result  | Comment                                            |
|-----------------------------------------------|---------------------|---------|----------------------------------------------------|
| successful login with existent user (moldcell | High                | Not run | Test task requires to not proceed after login page |

|                                                             |        |        |  |
|-------------------------------------------------------------|--------|--------|--|
| number/email + password)                                    |        |        |  |
| unsuccessful login with non-existent user (moldcell number) | High   | Passed |  |
| unsuccessful login with non-existent user (other number)    | High   | Passed |  |
| unsuccessful login without completed field(-s)              | High   | Passed |  |
| check "Show/un-show password"                               | Low    | Passed |  |
| Redirect to "Sign Up" page                                  | High   | Passed |  |
| Redirect to "Forgot your password page?"                    | High   | Passed |  |
| Redirect to "Terms of user agreement" page                  | Medium | Passed |  |

Restore password page:

| Test case                                                                                      | Priority of testing | Result | Comment |
|------------------------------------------------------------------------------------------------|---------------------|--------|---------|
| successful start user restore with existent user (moldcell number/email), redirect to OTP page | High                | Passed |         |
| unsuccessful start user restore with existent user (moldcell number/email)                     | High                | Passed |         |

|                                                                   |        |        |                                                                                                                                       |
|-------------------------------------------------------------------|--------|--------|---------------------------------------------------------------------------------------------------------------------------------------|
| unsuccessful start user restore with existent user (other number) | High   | 50/50  | Despite the fact that user can't restore such user, he will not receive respective error, as in the previous test. Should be bugfixed |
| Redirect back to "Enter number/email" from OTP page               | High   | Passed |                                                                                                                                       |
| Enter correct OTP                                                 | High   | Passed |                                                                                                                                       |
| Enter wrong OTP                                                   | High   | Passed |                                                                                                                                       |
| Enter wrong OTP 3 times                                           | Medium | Passed | During exploratory testing, observed that after 3 attempts, original OTP also invalidates and cannot be used                          |
| Redirect to "Sign In" page                                        | High   | Passed |                                                                                                                                       |
| Redirect to "Sign Up" page                                        | High   | Passed |                                                                                                                                       |

Registration page:

| Test case                                                                                             | Priority of testing | Result  | Comment                                               |
|-------------------------------------------------------------------------------------------------------|---------------------|---------|-------------------------------------------------------|
| Start registration with number                                                                        | High                | Passed  |                                                       |
| Start registration with email                                                                         | High                | Passed  |                                                       |
| Successful register with new number/email, correct password and agreement of processing personal data | High                | Not run | Test task requires to not proceed after register page |

|                                                                                                                   |      |        |  |
|-------------------------------------------------------------------------------------------------------------------|------|--------|--|
| Unsuccessful register with existent user number/email, correct password and agreement of processing personal data | High | Passed |  |
| Press "Confirm" without completing some field, receive warning                                                    | High | Passed |  |
| Press "Confirm" without check of agreement of processing personal data, receive warning                           | High | Passed |  |
| Enter password that doesn't correspond with requirements, receive warning                                         | High | Passed |  |
| Enter "confirm password" that doesn't correspond with original password field, receive warning                    | High | Passed |  |
